

Girls can't be what they can't see

OC STEM jobs are growing, yet our region faces a shortfall of STEMeducated workers. Women remain widely under-represented in most STEM professions, with females filling only 24% of STEM jobs nationally.

Timing is critical. Studies show that girls lose or gain interest in STEM by 8th grade. The Girl Scouts of Orange County STEM Consortium sponsored programs inspire girls to embrace STEM, understand its role in their lives, and learn how STEM can be part of their future careers.

The Girl Scouts of Orange County STEM Consortium inspires girls to embrace the power of science, technology, engineering, and math.

Launched in 2015, it is the first collaboration of its kind in OC to bring leading STEM companies together with Girl Scouts of Orange County to support diverse and enriching STEM programs and experiences for OC's nearly 15,000 Girl Scouts.

Girl Scout Cadettes meet with a representative from PAAMCO. STEM Consortium Sponsored events and programs provide Girl Scouts across Orange County with hands-on, real-world opportunities to connect with science, technology, engineering, and math and explore possible careers in STEM fields through role models from STEM Consortium sponsors.

Thanks to the generosity of our STEM Consortium sponsors, Orange County Girl Scouts are exploring varied aspects of STEM every year and recognizing the importance and power of STEM for their future success.

STEM Consortium Sponsor Levels

By supporting the Girl Scout Movement, you invest in the future of girls and help close the gap to bring gender balance to the leadership table. In a very real sense, investing in girls is investing in the future of our county, our nation, and our world.

Inclusion in Girl Scouts of Orange County's Annual Report via company mention on STEM program page	٠	٠	•	٠

Before my experience at Kaiser, I was planning on pursuing a career in business or marketing. After being exposed to the simulation lab and seeing what this career path has to offer, I feel as though I have a greater understanding of the medical field. This opportunity has opened my eyes to more options, and I can definitely see myself pursuing STEM activities in school and in Girl Scouts.
